

"What if men and  
women switched for a  
day?"

## Think- Pair- Share

### **Which fact is the most shocking to you, and why?**

- Men talk 75% of the time in meetings.
- Women can still be forced to wear heels in some jobs in the UK.
- Women can earn 25-40% less than a man doing the same job.
- 35% of countries have no regulation to prevent sexual harassment in the workplace.
- Women spend £5000 on period products in their lifetime.
- Women are statistically more likely to experience harassment or feel unsafe in public spaces.
- Women, particularly in Western cultures, often face intense pressure to conform to certain beauty standards, with estimates suggesting women spend 10–20% of their disposable income on beauty products and services.

In pairs or small groups, choose one question to discuss and be ready to feedback to your form group.

- A. Do you think the way the children were treated in this experiment reflects how boys and girls are treated in real life? In what ways?
- B. Why is it important for society to question gender-based stereotypes and roles? What could happen if we didn't?
- C. How do you think the children in this experiment would have reacted if the jars of sweets were swapped, and they received the "opposite" gender's jar?
- D. What can we do as a society to make sure children aren't limited by traditional gender roles, and everyone has the same opportunities?
