

BUCKS SKILLS SHOW 2023

In the Spring term, Year 10 visited the Bucks Skills Show this week. With over 130 businesses and organisations attending, it was the perfect opportunity to meet a wide range of employers from local, national and international industries keen to spot the talent of the future. Our students discovered what it was like to work in key industries, what skills and qualifications they need to get their first job and what steps they should take between now and at the point of application. They also took part in multiple interactive activities and networked with representatives from:

- Construction and Civil Engineering
- Creative Industries
- Digital Technology
- High Performance Engineering and Manufacturing
- Life Science, Health Care and Social Care
- Space
- Financial and Professional Services
- Hospitality, Leisure and Tourism
- Public Sector
- Next Steps – Further Education, Higher Education, Training or Development

"I found our visit to The Bucks Skills Show very beneficial as it has given me a few ideas of what I would like to do in the future. There was a varied mix of businesses and companies, there was something for everyone" Evie Finch Year 10
