

## Year 10 Students Thrive in RISE Workshops.

Over the past three weeks, Year 10 students had the opportunity to take part in the RISE workshops, a series of educational and professional development sessions designed to inspire and prepare students for the future. These workshops, organised by The Talent Foundry, provided an invaluable experience, helping students explore a wide range of career paths, build essential skills employers need, and gain insights into the world of work.

Students engaged in interactive workshops, skill-building activities and curriculum subjects were brought to life by linking them to real world careers. They were encouraged to think critically about their strengths, interests, and the type of career they would like to pursue.

A major highlight of the programme was the involvement of the ICAEW (Institute of Chartered Accountants in England and Wales) The ICAEW, one of the leading professional bodies for accountants offering students a unique insight into the world of business and finance. During the workshops, the ICAEW facilitators helped students understand the importance of critical thinking, problem-solving, and effective communication in the workplace.

Overall, the RISE workshops provided Year 10 students with the tools, knowledge, and inspiration to approach their futures with confidence and clarity. We look forward to seeing how these experiences shape their career aspirations and personal growth in the years to come.
