

Exploring Pathways Y11 & Y10: West Herts College talk

On Tuesday 25th March, students from Year 10 and Year 11 had the exciting opportunity to hear from the Associate Director of Marketing and Recruitment at West Herts College. This visit was designed to showcase the various educational pathways available to students after Year 11.

West Herts College is known for its diverse range of vocational courses, including BTECs and T Levels and apprenticeships, which offer students practical, hands-on experience in their chosen fields. The college offers over 150 courses in sectors ranging from Engineering, Health and Social Care to Creative Arts.

During the talk, students learned about some of the college's most popular BTECs, including Forensic Science and Criminology, Electrical Engineering, Architecture, and Interior Design.

These courses not only provide essential theoretical knowledge but also equip students with the skills needed for their future careers.

In addition to BTECs, West Herts College also offers T Levels—new, technical qualifications designed in collaboration with employers to ensure students gain relevant skills for the workforce.

For the vocational courses, students have access to facilities such as digital gaming labs, hair and beauty salons and plumbing and electrical engineering workshops.

At your fingertips

Watford Campus

- Science Labs
- Fitness & Dance Studios
- Professional Kitchens
- Business Lounge
