

National Careers Week – Own Your Future

2nd – 6th March

Next week, we're proud to be taking part in **National Careers Week**, a nationwide celebration that aims to raise awareness of career pathways and inspire students to think ambitiously about their futures.

Throughout the week, students will take part in a range of engaging form-time activities designed to broaden their horizons and spark conversations about the world of work. We're also delighted to welcome Bucks New University, who will be speaking to Y11&12 students about apprenticeship opportunities in a range of industries

On Wednesday 4th March, Year 10 will visit the Bucks Skills Show – the largest skills show in Buckinghamshire and a fantastic gateway to local and international industries. With over 120 businesses and organisations attending, students will explore sectors including space, health and pharma, creative and media, public services, cyber-security, engineering, hospitality and construction, meeting employers keen to inspire the next generation of talent.

To help continue these important conversations at home, a National Careers Week Parents' Guide is available on [our website](#) to support you and your child in exploring future career possibilities together.
