

Preparing for the Future: Year 12 CV Writing Workshop

All Year 12 students recently took part in an engaging CV workshop led by our independent Careers Adviser, Mrs Lewis. During the session, students learned about the key elements that make an effective CV, as well as common mistakes to avoid when applying for jobs, apprenticeships, and further opportunities.

Many students were surprised to discover that employers spend, on average, just six seconds reviewing a CV. This highlighted the importance of creating a clear, professional, and well-presented document that makes a strong first impression.

Following Mrs Lewis's expert guidance, students took part in a fantastic interactive session where they began creating and developing their own CVs. The workshop provided valuable practical experience and helped students build confidence in presenting their skills, achievements, and experiences effectively.

We look forward to seeing our Year 12 students put these important employability skills into practice as they prepare for their future careers
